Site Assessment Report

Address	13 Meehan Gardens, Griffith
Zoning	RZ1 – Suburban Zone
Prepared for	William Honey
Date	20 January 2026

YOUR BLOCK AT A GLANCE

Block size	949 m ²
Frontage	19 m
Zone	RZ1
Your intention	Joint venture

These measurements are drawn from ACT Government mapping and may differ slightly from a formal survey.

WHAT THE REFORMS NOW ALLOW FOR BLOCKS YOUR SIZE

Based on your block size of 949 m², the Missing Middle reforms now permit:

Block size threshold	What's now allowed
✓ 400m ² +	Dual occupancy (two dwellings, one title)
✓ 500m ² +	Secondary residence up to 120m ²
✓ 600m ² +	Unit titling (two dwellings, separate titles)
✓ 800m ² +	Up to three dwellings

Your block at 949 m² qualifies for: Dual occupancy (two dwellings, one title), Secondary residence up to 120m², Unit titling (two dwellings, separate titles), and Up to three dwellings

These are the headline permissions. Whether they're achievable on your specific block depends on access, trees, and other constraints assessed below.

ZONING

Your block is zoned RZ1 – Suburban Zone.

RZ1 is the most common residential zone in Canberra, covering established suburban areas. Historically, RZ1 has been restricted to one main dwelling per block, with limited options for adding a second home. The

ACT Government's Missing Middle reforms are changing this — removing minimum block size requirements and opening up new possibilities for dual occupancy, granny flats, and in some cases, subdivision.

Understanding your zone is the foundation for knowing what's possible. The sections below assess your specific block against both current rules and the new reforms.

EXISTING HOUSE

House position: Middle || **House footprint:** 457 m²

The existing house is positioned in the middle of the block. This limits the usable space for adding a second dwelling behind the house while retaining the original home. For most redevelopment options — such as dual occupancy or subdivision — the existing house would likely need to be removed or substantially altered.

REAR YARD SPACE

Rear yard: Minimal || **Depth:** 5.2 m

Your rear yard depth is approximately 5.2 m, which is unlikely to accommodate a second dwelling behind the existing house. For redevelopment options like dual occupancy or subdivision, removing the existing house would likely be required.

SITE COVERAGE

Under current rules, buildings can cover a maximum of 50% of your block. Based on your block size of 949 m², the maximum building footprint allowed is 475 m².

The existing house occupies approximately 457 m², leaving a remaining building allowance of approximately 18 m².

This is below the typical size for a granny flat (up to 90m²). Adding a second dwelling while keeping the existing house may not be feasible under site coverage rules. Redevelopment options that involve removing the existing house would reset this calculation.

TREES

Large trees visible: 0 || **Tree location:** Multiple locations

Based on the latest aerial imagery, there do not appear to be any significant trees on your block.

This is favourable for redevelopment flexibility, as there are no tree protection zones to work around. However, be aware that the ACT Government is increasing tree canopy requirements for new developments. You may be required to plant new trees as part of any development.

HERITAGE

Heritage overlay: No

Based on ACT Government mapping, your property is not within a heritage overlay.

This means there are no heritage-related restrictions on demolishing, altering, or extending the existing house, and no heritage constraints on new structures. This is favourable for redevelopment flexibility.

EASEMENTS

Easements: None visible

Based on the available mapping, there do not appear to be any easements running through your block.

Easements are legal rights for utilities or access that restrict what you can build in certain areas. Common easements include sewer, stormwater, and electrical easements. If an easement runs through the middle of a block, it can significantly limit where a new dwelling or driveway can be positioned.

The absence of visible easements is a positive sign for redevelopment flexibility. A title search or survey would confirm this definitively.

SEWER

Sewer location: Rear

Based on the available mapping, the sewer connection for your block appears to be located at the rear of the property.

This may affect how a second dwelling or subdivision is serviced. Extending sewer to a new dwelling at the front or middle of the block may involve additional costs. This would be assessed as part of any detailed feasibility review.

DRIVEWAY & ACCESS

Frontage: 19 m || **Second driveway:** Yes / Possible / Tight / Unlikely

For dual occupancy or subdivision, a second driveway is typically required to provide independent access to each dwelling.

Your frontage of 19 m is sufficient for a second driveway. Based on the aerial imagery, there appear to be no significant obstructions (trees, power poles, or existing structures) blocking potential driveway locations.

This is favourable for redevelopment options that require separate access.

WHAT THIS MEANS FOR YOUR BLOCK

Based on the assessment above, here is what you could typically do given the constraints identified on your block:

- ✓ **Granny flat:** Add a granny flat behind the existing house (up to 90m²), subject to setbacks, tree constraints, and access.
- ✓ **Dual occupancy:** Dual occupancy (two dwellings on one title) may be possible, likely requiring removal of the existing house.
- ✓ **Subdivision:** Subdivision into two separate titles may be possible, subject to minimum lot sizes and access requirements.
- ✓ **Three dwellings:** Possible in theory. At 949 m², your block exceeds the 800m² threshold. However, fitting three dwellings while managing trees, sewer servicing, and parking can be challenging. A detailed feasibility review would confirm whether this is realistic.

Summary: Your block appears well suited to a secondary residence while retaining the existing house, subject to confirming access and services in a detailed feasibility review.

YOUR RECOMMENDED NEXT STEP

You indicated you're interested in partnering or joint venturing on this site.

BlockPlanner works with landowners who want to unlock the value of their site without taking on the full risk and complexity of development.

Your recommended next step is a Detailed Feasibility Review. If the numbers stack up, we can then discuss partnership structures and delivery options.

Book a call with our team to discuss your options.

- Lease purpose clause — whether your lease permits multiple dwellings or requires a variation
- Tree status — confirming which trees are protected and mapping their protection zones
- Services capacity — whether sewer, stormwater, and electrical networks can support additional dwellings without upgrades
- Solar access and overshadowing — how orientation and neighbours affect building envelopes
- Parking layout — whether compliant parking can be achieved on site
- Preliminary site layout options — showing what could realistically fit
- High-level cost estimates and indicative end values

IMPORTANT DISCLAIMER

This report is based on ACT Government mapping, aerial imagery, and publicly available planning information. It is not a formal planning assessment, survey, engineering report, or guarantee of approval.

All development must comply with ACT laws, the Territory Plan, and technical requirements. Site-specific conditions — including exact tree status, easement locations, sewer alignment, and heritage requirements — should be confirmed through detailed due diligence before committing to any design or construction.

BlockPlanner is not a licensed planning consultancy. Where formal planning advice or development applications are required, we work with registered planners and can coordinate this on your behalf.

WHAT HAPPENS NEXT

1. **Review this report** — take your time to understand your block's potential and constraints.
2. **Book a call** — we'll walk through the findings and answer any questions. No obligation, no pressure.
3. **Detailed Feasibility Review** — if you want to proceed, we'll confirm all constraints and give you a clear go/no-go assessment with numbers.
4. **Choose your pathway** — develop yourself, partner with us, or sell with confidence.
